

EXCERPT: TECHNICAL DUE DILIGENCE

OBJECTIVE:

Determine whether the project can survive
known failure modes and unknown unknowns.

SCOPE:

Claims, evidence, assumptions, dependencies,
and decision rights.

METHOD:

Interrogate. Validate. Stress. Document.
Handoff with clarity.

InTelluric

Technical co-author for consequential handoffs.

FAILURE IS INFORMATION.
SO IS DISCIPLINE.

THRESHOLDS:

- * TECHNICAL FEASIBILITY
- * COMMERCIAL VIABILITY
- * LEGAL DEFENSIBILITY
- * OPERATIONAL READINESS
- * REPUTATIONAL RESILIENCE

EXCERPT: HANDOFF REPORT

STATUS: COMPLETE

CONFIDENCE: EVIDENCE-BACKED

RECOMMENDATION:
PROCEED WITH EYES OPEN.

NOTES:

UNCERTAINTY IS INEVITABLE.
AMBIGUITY IS OPTIONAL.

DOCUMENT THE WHY,
SO OTHERS CAN DECIDE
THE WHAT.

FOR TECHNICAL FOUNDERS, RESEARCH TEAMS, AND OPERATORS AT CRITICAL THRESHOLDS

[EXCERPT 7.4.2]
Tolerance stack-up summary
... values shown are nominal.
nt: see see §7.4.2.1

TECHNICAL HANDOFF RISK

The next handoff decides whether the project survives.

Hidden failure points, untested assumptions, outdated design elements, and even the wrong typo can become fatal once committed to documentation that future readers must interpret without the founder present.

[NOTE: context incomplete]
Boundary conditions undefined
... see Appendix C (draft)
status: pending

REVIEW EXCERPT [concept only]	REDLINE [concept only]	SCHEMATIC FRAGMENT [concept only]	VARIABLE DEFINITION [concept only]	TRACE NOTE [concept only]
"Component interface defined in Fig. 3." See text for <u>details.</u> " <i>vague</i>	"The system shall be operate within safe limits." <i>ambiguous</i>		k = efficiency factor η = loss coef. σ = stress <i>units missing</i>	Assumption used in §4.2, §5.1, §6.3. <i>[no source link]</i>

 INVESTMENT Capital decisions made on incomplete or misinterpreted technical records.	 GRANT REVIEW Reviewers cannot verify assumptions that were never stated or tested.	 REGULATORY REVIEW Compliance judged against documentation, not intent or oral explanations.	 PATENT DISPUTE Scope and validity hinge on what is written—and what is missing.	 FEASIBILITY DECISION Go / no-go based on data that may be flawed, buried, or untraceable.
--	--	---	---	---

INSIDE THE FOUNDER'S HEAD

OUTSIDE THE ROOM

EVIDENCE BAND

Standards that
separate belief
from record.

CLARITY UNDER PRESSURE

Can a competent skeptic reconstruct the core
claim, scope, and logic without the author?

→ Test: Remove the author. Read for meaning.

VERIFIABILITY OF CLAIMS

Are claims anchored to traceable sources,
models, tests, or prior art?

→ Test: Follow every material assertion to evidence.

DECISION USABILITY

Does the record contain what a decision-maker
needs to act responsibly?

→ Test: Can a third party decide with confidence.

Records don't just inform decisions.
They enable them to endure scrutiny,
transition, and time.

WRITE FOR ABSENTIA.

§ 4.2.1 Control Loop

The controller SHALL maintain stability under expected disturbances.

? ASSUMPTION:
Disturbance model bounded.
Unstated frequency content.
No proof of margins.

We interrogate technical communication until the vision can survive hostile reading.

REDLINE NOTES:
> Undefined term: "safe"
> Units inconsistent § 3.1 vs § 7.4
> Boundary conditions not specified
> Failure modes insufficient

 PITCH DECKS clarity under scrutiny	 IRB PROPOSALS reviewer anticipation	 GRANT APPLICATIONS defensible articulation	 PATENT LITIGATION mechanism precision	 FEASIBILITY ASSESSMENTS risk exposure early
 MOCK COMMITTEE FEEDBACK hostile-reader simulation	 INDEPENDENT TECHNICAL REVIEW assumption tracing	 RED TEAM AUDITS failure-path surfacing	 DUE DILIGENCE decision-ready rigor	 TECHNICAL BASIS REPORTS dependency stack clarity

- SCOPED BY DELIVERABLES
- NO BILLABLE HOURS
- NO IP CLAIMS

EXCERPT: REPORT DRAFT 1.2

"The results demonstrate acceptable performance across all scenarios."

? WHAT IS "ACCEPTABLE"?
No threshold stated.
No scenario inventory.
No sensitivity analysis.

Serious builders will be judged by whether their ideas can survive independent scrutiny.

WHAT WE ARE NOT

Not storytelling
polish

note_01
PERSUASION ≠ SCRUTINY

WHAT WE ARE NOT

Not a substitute
for subject-matter
expertise

note_02
EXPERTISE IS IRREPLACEABLE

PROPOSED RAISE / USE OF PROCEEDS

\$750K pre-seed to expand reviewer bench, productize the review workflow, build repeatable red-team infrastructure, and accelerate threshold-based acquisition.

You have a *vision* — we draw the rest of it.
